MILAN

RIVELIN

Our vision is to help you create an outstanding outdoor living space to be enjoyed time and time again. As a focal point in any garden our fire tables provide the perfect setting to immerse yourself into your garden, and provide the catalyst for conversation as the flames gently warm the soul. We constantly push the boundaries and ourselves to deliver luxury outdoor furniture that lead the field embodying form and function, art and technology, all crafted within the UK.

The Milan Gas Fire Dining Table was designed for restaurants and foodies who love eating outdoors. Designed for dining table height rather than coffee table height, the Milan provides ample space for 8 guests to be seated and enjoy eating around. Treat your guests to an unsurpassed alfresco dining experience and enjoy the flow of conversation as the table provides warmth and comfort through to the early hours.

LUXURY OUTDOOR LIVING

The Milan incorporates our very own Rivelin 18kw pre-aerated burner (LPG or Natural Gas), providing a wonderful feature to gather around and relax. In addition to the heat produced, the fire will also bathe the surrounding area in a warm orange glow, which sets the mood for a perfect evening. Rivelin's signature 4 piece crystal clear glass windshield frames the fire and enhances its flame picture, whilst also being easily removed and installed in seconds. The Milan is enhanced further with the addition of LED downlighting making the table a real stand out feature in any setting.

Like all our gas fire tables, the Milan is supplied with a weatherproof fabric table cover along with a marine grade stainless steel lid, and is manufactured and hand crafted in Sheffield, UK.
