MANHATTAN

RIVELIN

Our vision is to help you create an outstanding outdoor living space to be enjoyed time and time again. As a focal point in any garden our fire tables provide the perfect setting to immerse yourself into your garden, and provide the catalyst for conversation as the flames gently warm the soul. We constantly push the boundaries and ourselves to deliver luxury outdoor furniture that lead the field embodying form and function, art and technology, all crafted within the UK.

Immaculate lines and compact design give an unmistakable profile providing perfect proportions that enable the Manhattan to be enjoyed wherever it is installed. The design and build quality delivers a crisp modern outline and look of reassuring solidity. Set at coffee table height, it provides a wonderful feature to gather around and relax. In addition to the heat produced, the fire will also bathe the surrounding area in a warm orange glow, which sets the mood for a perfect evening.

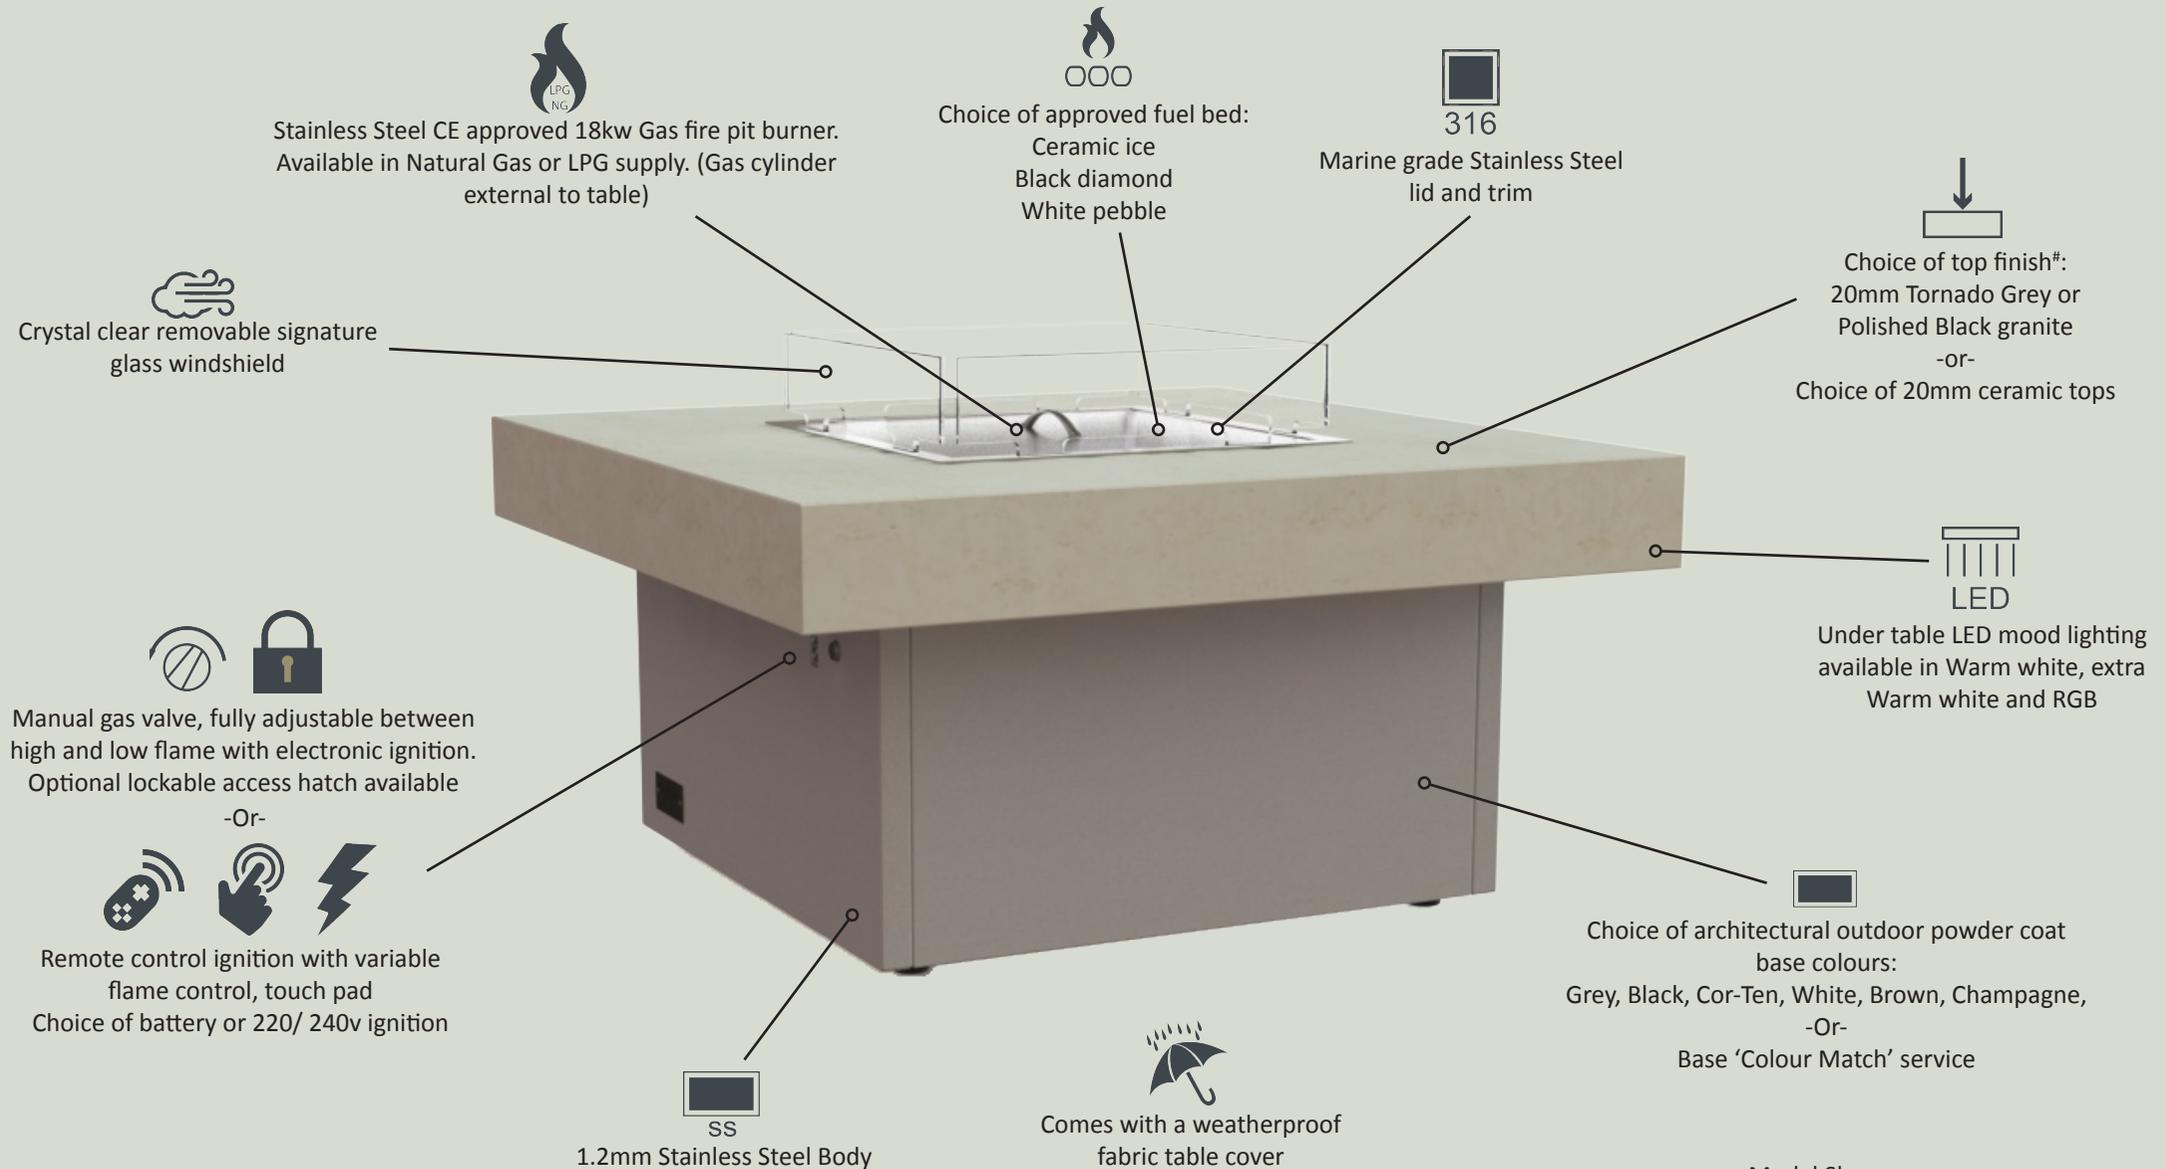

LUXURY OUTDOOR LIVING

Incorporating Rivelin's own unique, pre-aerated 18kw burner (LPG or Natural Gas) with either battery or 220/ 240V ignition, and optional remote handset, the Manhattan delivers on both aesthetics and function. LED downlighting can be added to the Manhattan providing added drama to the experience. Rivelin's signature 4 piece crystal clear glass windshield is also incorporated in to the design, this frames the fire and enhances its flame picture, whilst also being easily removed and installed in seconds.

Like all our gas fire tables, the Madrid is supplied with a weatherproof fabric table cover along with a marine grade stainless steel lid, and is manufactured and hand crafted in Sheffield, UK.
