Explore your

VALENCIA  
100

Our vision is to help you create an outstanding outdoor living space to be enjoyed time and time again. As a focal point in any garden our fire tables provide the perfect setting to immerse yourself into your garden, and provide the catalyst for conversation as the flames gently warm the soul. We constantly push the boundaries and ourselves to deliver luxury outdoor furniture that lead the field embodying form and function, art and technology, all crafted within the UK.

The Valencia family of fire bowls are produced from stainless steel spun especially for Rivelin and finished by craftsmen. The Valencia 100 is available in its natural stainless steel which can be brushed or mirror polished. Alternatively it can be powder coated in a range of colours. The fire bowl is finished with a choice of natural granite or sintered ceramic tops sculpted by expert craftsmen and offer high levels of beauty and durability as well as UV and stain resistance. With 3 sizes in the range to choose from, you will be sure to find the perfect bowl for your setting.

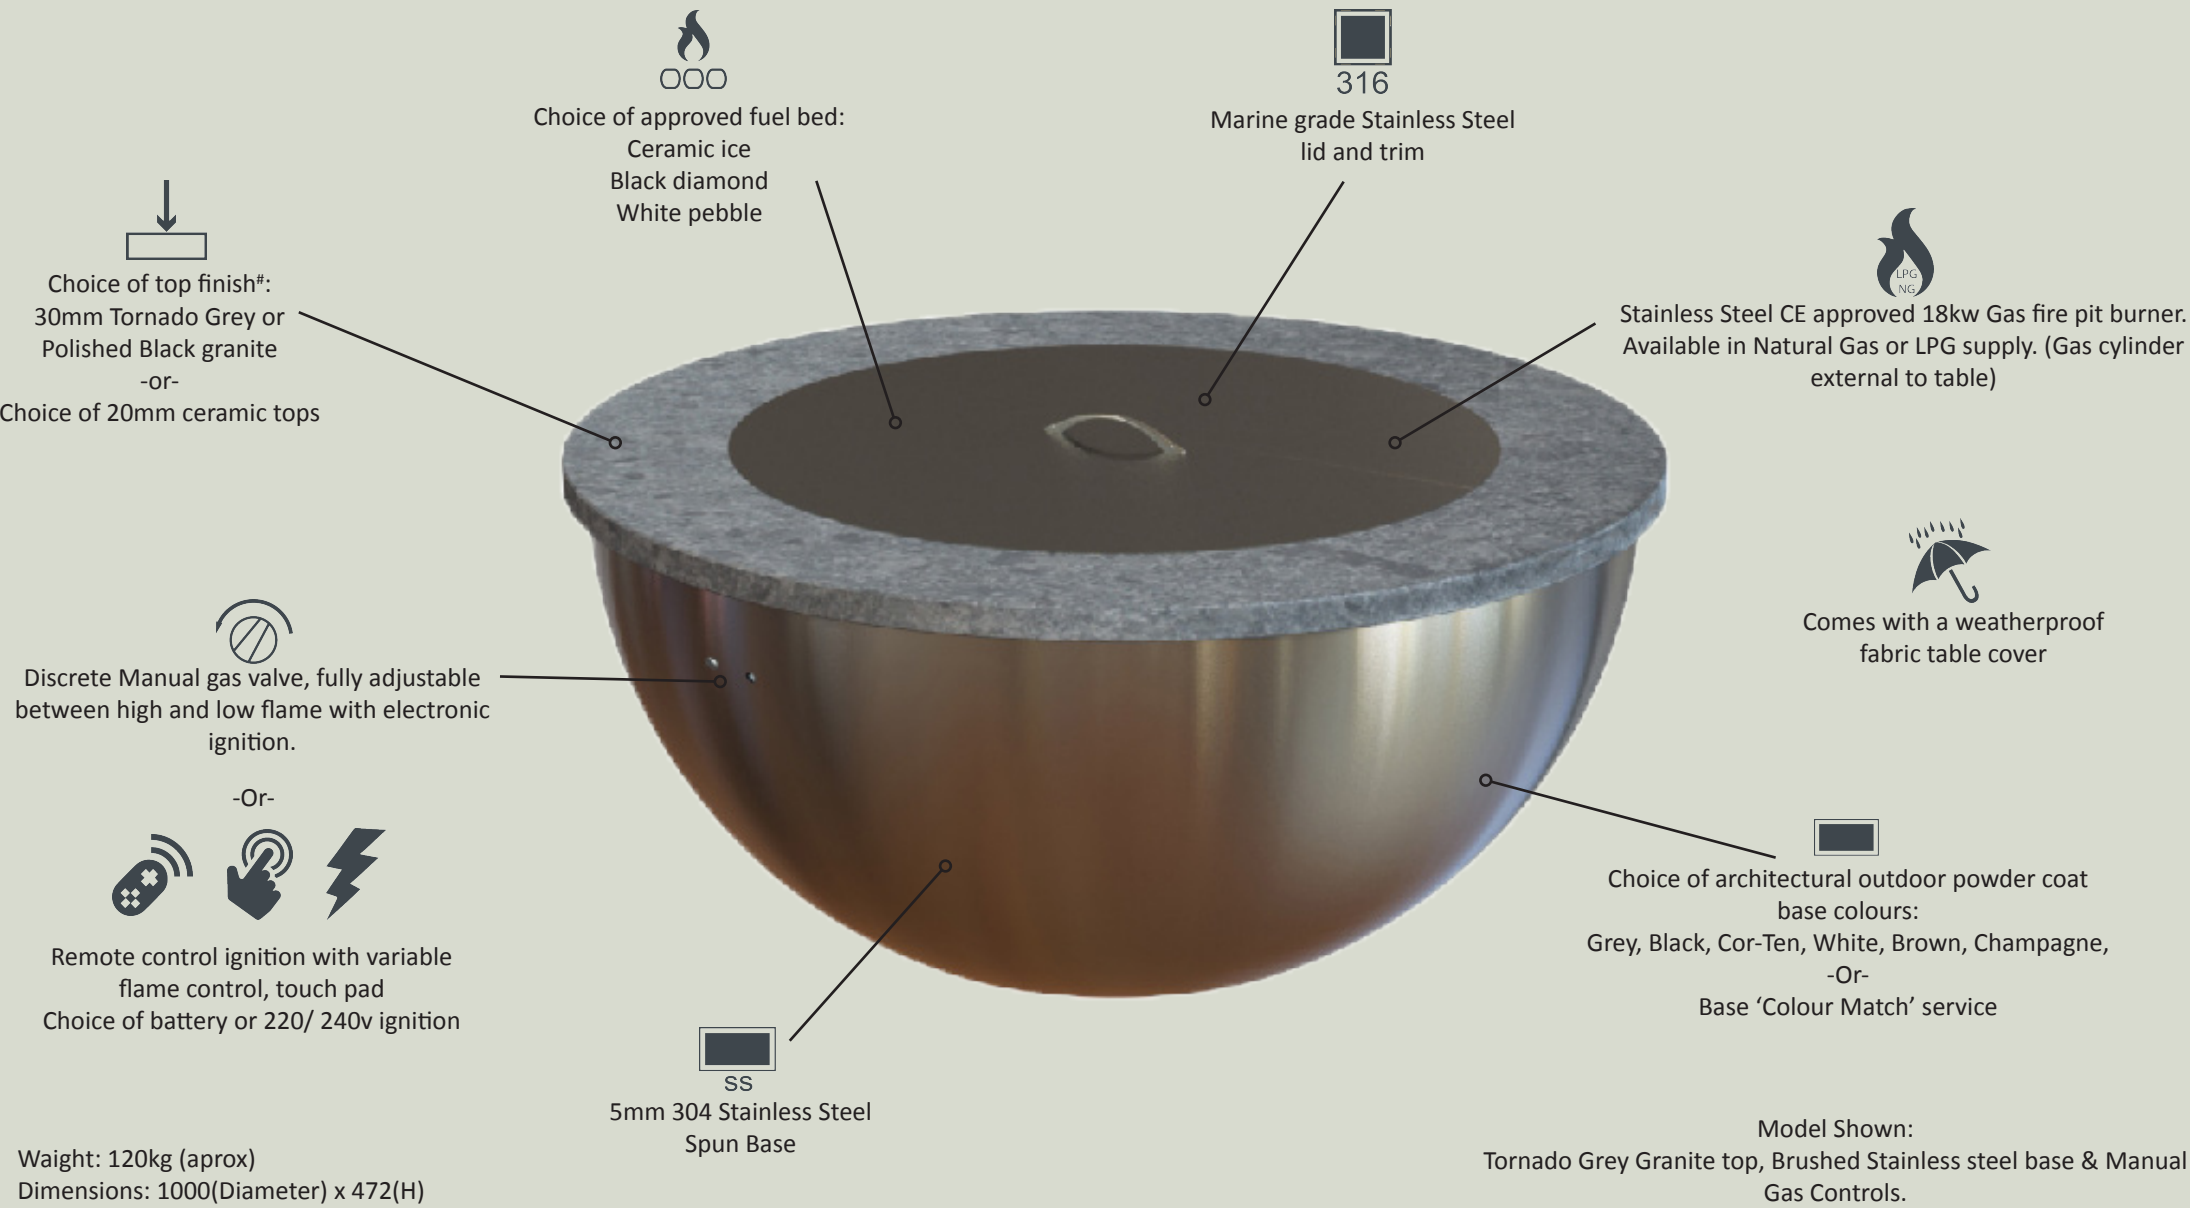

## LUXURY OUTDOOR LIVING

The gas fire is controlled by a battery powered electronic spark ignition manual gas valve which is located on the outside of the bowl or by an optional full electronic ignition touch pad system, located up to 16m away from the bowl in a waterproof enclosure ensuring that the perfect lines of the bowl remain untouched.

Like all our gas fire tables, the Valencia is supplied with a weatherproof fabric table cover along with a marine grade stainless steel lid, and is designed and hand crafted by ourselves in Sheffield, UK.
